You have chosen the leading, medical doctor recommended whey protein meal replacement program. Our meal replacement whey protein drink mix is back by leading board certified bariatric and minimally invasive surgeons, Dr. Christopher Joyce, M.D., F.A.C.S., and Dr. Brian Lahmann, M.D., F.A.C.S. of the Bariatric and Minimally Invasive Surgery.

M.D. PROTEIN is specifically designed for individuals who are looking for an ultra high quality protein to supplement their diet and serve as a meal replacement. M.D. PROTEIN is made from the purest grade, non-denatured, specially filtered and ion exchanged whey protein available. Every serving is packed with a high biological value protein that is low in carbs, fat and calories.

Our meal replacement provides the perfect natural balance of the essential amino acids your body requires for improved nitrogen balance, muscle growth and protein synthesis in a readily absorbed and utilized form. M.D. PROTEIN is high in Branches Chain Amino Acids (BCAAs) to protect and fuel lean muscle tissue during high intensity exercise. M.D. PROTEIN is free of gluten, wheat and GMO. The benefits of a whey protein rich diet helps the body burn fat and grow lean muscle, while strategically replacing excessive calories with a tasty meal replacement.

For more information about M.D. PROTEIN and other great medical doctor recommended lines of vitamins and nutritional supplements please visit www.BMISurgery.org or contact us at 815-717-8744. If you are not satisfied with this product in any way, please contact Customer Service at 800-808-8800.

Directions for Use:

For a great tasting protein shake, fill a shaker bottle with 6-8 ounces of cold water. Add 1 scoop of M.D. PROTEIN. Cover and shake for 25-30 seconds. Enjoy.

SERVING SCOOP INCLUDED BUT MAY SETTLE TO THE BOTTOM DURING SHIPPING**For Building Lean Muscle:**

Muscle is mainly protein and water. To build lean muscle faster, take 2.5-2.8g of protein per day per kilo of lean body mass.

Body weight – (body weight x % body fat) = Lean Body Mass (LBM)

(1 Kilogram = 2.2 pounds)

LBM kg/lbs	50/110	70/154	90/198	110/242	130/286
Protein/Crete	75	105	135	165	195
Ultimate Protein	30	50	60	70	90

For Weight Measurement:

The Secret to dieting is to lose fat, not muscle. Total protein intake should be 1.5-2g of protein per day per kilo of lean body mass (LBM). For efficient weight loss, approximately 50% of your daily protein intake should be from M.D. PROTEIN.

LBM kg/lbs	50/110	70/154	90/198	110/242	130/286
Protein/Crete	75	105	135	165	195
Ultimate Protein	30	50	60	70	90
